

Portable Appliance Testing (PAT)

Electrical appliances used in your organisation

Have you had them PAT tested this year ?

The Health & Safety at Work Act 1974 puts the duty of care upon both the employer and the employee to ensure the safety of all persons using the work premises.

The Management of Health & Safety at Work Regulations 1999 states:

Every employer shall make suitable and sufficient assessment of:

- (a) the risks to the health and safety of his employees to which they are exposed whilst at work, and
- (b) the risks to ensure the health and safety of persons not in his employment arising out of or in connection with the conduct by him or his undertaking.

What do you have in your office – how safe is that kettle?

The computers, the table lights and the heater used only in the winter?

SCCA can now offer PAT testing to the Voluntary sector

Special rates for the voluntary Sector
